

establishConnection_

interrupt

onRealtimeDisconnect_

```
graph LR; A[establishConnection_] --> C[onRealtimeDisconnect_]; B[interrupt] --> C;
```

The diagram illustrates a flow where two separate components, 'establishConnection_' and 'interrupt', both trigger or lead to a common component, 'onRealtimeDisconnect_'. The first component is positioned above the second, and both have arrows pointing towards the third component on the right. The third component is shaded gray, while the others are white with black borders.
