

syncTreeApplyUserMerge

syncTreeApplyUserOverwrite

newOperationSourceUser

```
graph LR; A[syncTreeApplyUserMerge] --> C[newOperationSourceUser]; B[syncTreeApplyUserOverwrite] --> C;
```

The diagram illustrates a flow where two separate operations, 'syncTreeApplyUserMerge' and 'syncTreeApplyUserOverwrite', both lead to a common destination, 'newOperationSourceUser'. The boxes for the source operations are white with black borders, while the destination box is gray with a black border. Blue arrows indicate the direction of the flow from left to right.
