

stream_1::Readable

```
classDiagram
    class stream_1_Readable["stream_1::Readable"]
    class ClientReadableStreamImpl
    ClientReadableStreamImpl --|> stream_1_Readable
```

The diagram shows a class hierarchy. At the top is a box for 'stream_1::Readable' with two empty compartments. Below it is a box for 'ClientReadableStreamImpl' with a list of methods. A blue arrow points from the 'ClientReadableStreamImpl' box up to the 'stream_1::Readable' box, indicating that 'ClientReadableStreamImpl' inherits from 'stream_1::Readable'.

ClientReadableStreamImpl

- + constructor()
- + cancel()
- + getPeer()
- + _read()
