

EndpointMap::set

```
graph LR; A[EndpointMap::set] --> B[endpointEqualUnordered]
```

A diagram showing a mapping from a method to a variable. On the left, a gray rectangular box contains the text 'EndpointMap::set'. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'endpointEqualUnordered'. Both boxes have a thin black border.

endpointEqualUnordered
