

`cors`

```
graph LR; cors[cors] --> configureAllowedHeaders[configureAllowedHeaders];
```

The diagram consists of two rectangular boxes connected by a blue arrow. The box on the left is white with a black border and contains the text 'cors'. The box on the right is gray with a black border and contains the text 'configureAllowedHeaders'. A blue arrow points from the right side of the 'cors' box to the left side of the 'configureAllowedHeaders' box.

`configureAllowedHeaders`
