

RetryingCall::halfClose

RetryingCall::sendMessage
WithContext

RetryingCall::getNextBuffer
Index

```
graph LR; A[RetryingCall::halfClose] --> C[RetryingCall::getNextBuffer Index]; B[RetryingCall::sendMessage WithContext] --> C;
```

The diagram illustrates a control flow where two different methods, `RetryingCall::halfClose` and `RetryingCall::sendMessage WithContext`, both lead to the same target operation, `RetryingCall::getNextBuffer Index`. The source methods are represented by white boxes, while the target operation is in a gray box. Blue arrows indicate the direction of the flow from the sources to the target.
