

syncTreeApplyServerMerge

syncTreeApplyTaggedQuery
Merge

syncTreeApplyUserMerge

ImmutableTree::fromObject

```
graph LR; A[syncTreeApplyServerMerge] --> D[ImmutableTree::fromObject]; B[syncTreeApplyTaggedQuery Merge] --> D; C[syncTreeApplyUserMerge] --> D;
```

The diagram illustrates a dependency or relationship where three different merge functions—syncTreeApplyServerMerge, syncTreeApplyTaggedQuery Merge, and syncTreeApplyUserMerge—all point to a single function, ImmutableTree::fromObject. The arrows indicate that each of these functions utilizes or depends on the ImmutableTree::fromObject function.
