

takeObject

```
graph LR; A[takeObject] --> B[getObject]
```

A diagram showing a call from the `takeObject` method to the `getObject` method. The `takeObject` method is represented by a white rectangular box with a black border on the left. A blue arrow points from the right side of this box to the left side of the `getObject` method box. The `getObject` method is represented by a gray rectangular box with a black border on the right.
