

AsyncAction::unsubscribe

```
graph LR; A[AsyncAction::unsubscribe] --> B[AsyncAction::recycleAsyncId]; A --> C[state];
```

The diagram illustrates a branching logic from a single source node to two target nodes. The source node, 'AsyncAction::unsubscribe', is a dark gray rectangle on the left. Two blue arrows originate from its right side. The upper arrow points to a white rectangle labeled 'AsyncAction::recycleAsyncId'. The lower arrow points to a white rectangle labeled 'state'.

AsyncAction::recycleAsyncId
