

ChildrenNode::getChild

ChildrenNode::updateChild

ChildrenNode::getImmediate
Child

```
graph LR; A[ChildrenNode::getChild] --> C[ChildrenNode::getImmediate Child]; B[ChildrenNode::updateChild] --> C;
```

The diagram illustrates a mapping from two source methods to a single target method. On the left, two white rectangular boxes with black borders contain the text 'ChildrenNode::getChild' and 'ChildrenNode::updateChild'. On the right, a larger gray rectangular box with a black border contains the text 'ChildrenNode::getImmediate Child'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'getChild' and 'updateChild' methods are associated with or mapped to the 'getImmediate Child' method.
