

Query::once

```
graph LR; A[Query::once] --> B[Query::getCancelAndContext  
Args_];
```

The diagram illustrates a function call. On the left, a gray rectangular box contains the text 'Query::once'. A blue arrow points from this box to a larger white rectangular box on the right. This white box contains the text 'Query::getCancelAndContext' on the top line and 'Args_' on the bottom line. Both boxes have a thin black border.

Query::getCancelAndContext
Args_
