

base_auth_1::BaseAuth

```
classDiagram
    class base_auth_1_BaseAuth {
    }
    class TenantAwareAuth {
        + constructor()
        + verifyIdToken()
        + createSessionCookie()
        + verifySessionCookie()
    }
    TenantAwareAuth --|> base_auth_1_BaseAuth
```

The diagram illustrates a class hierarchy. At the top is the 'base_auth_1::BaseAuth' class, represented by a white box with a black border and two empty internal compartments. Below it is the 'TenantAwareAuth' class, represented by a grey box with a black border. A blue arrow with a hollow triangular head points from the 'TenantAwareAuth' class up to the 'base_auth_1::BaseAuth' class, indicating that 'TenantAwareAuth' inherits from 'base_auth_1::BaseAuth'. The 'TenantAwareAuth' class box is divided into three horizontal sections: the top section contains the class name, the middle section is empty, and the bottom section contains a list of four public methods, each preceded by a '+' sign.

TenantAwareAuth

- + constructor()
- + verifyIdToken()
- + createSessionCookie()
- + verifySessionCookie()
