

Command::maybeSetupIPC

Command::start

pipeTo

```
graph LR; A[Command::maybeSetupIPC] --> C[pipeTo]; B[Command::start] --> C;
```

The diagram illustrates a control flow where two methods, `Command::maybeSetupIPC` and `Command::start`, both lead to the `pipeTo` method. The source methods are represented by white boxes with black borders, while the target method is a gray box with a black border. Blue arrows indicate the direction of the flow from the source methods to the target method.
