

GaxiosError::constructor

```
graph LR; A[GaxiosError::constructor] --> B[translateData]
```

A diagram showing a call from the `GaxiosError::constructor` to the `translateData` function. The `GaxiosError::constructor` is represented by a white rectangular box with a black border on the left. A blue arrow points from the right side of this box to the left side of a gray rectangular box with a black border on the right, which contains the text `translateData`.
