

serializeHost

serializeIPv6

findLongestZeroSequence

```
graph LR; A[serializeHost] --> B[serializeIPv6]; B --> C[findLongestZeroSequence];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'serializeHost', followed by an arrow pointing to a box labeled 'serializeIPv6', which then points to a final box labeled 'findLongestZeroSequence'. The final box is shaded gray, indicating it is the current step or the final output of the process.
