

BaseAuth::verifyIdToken

BaseAuth::verifySessionCookie

BaseAuth::verifyDecodedJWTNot  
RevokedOrDisabled

```
graph LR; A[BaseAuth::verifyIdToken] --> C[BaseAuth::verifyDecodedJWTNot RevokedOrDisabled]; B[BaseAuth::verifySessionCookie] --> C;
```

The diagram illustrates a relationship between three methods. On the left, two white rectangular boxes with black borders contain the text 'BaseAuth::verifyIdToken' and 'BaseAuth::verifySessionCookie'. On the right, a larger gray rectangular box with a black border contains the text 'BaseAuth::verifyDecodedJWTNot RevokedOrDisabled'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'verifyIdToken' and 'verifySessionCookie' methods utilize or delegate to the 'verifyDecodedJWTNot RevokedOrDisabled' method.
