

ClientPool::release

ClientPool::terminate

ClientPool::opCount

```
graph LR; A[ClientPool::release] --> C[ClientPool::opCount]; B[ClientPool::terminate] --> C;
```

The diagram illustrates the relationship between two methods and a variable. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'ClientPool::release' and the bottom box contains 'ClientPool::terminate'. On the right, there is a gray rectangular box with a black border containing the text 'ClientPool::opCount'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box. The top arrow starts from the right side of the 'ClientPool::release' box and points to the top half of the 'ClientPool::opCount' box. The bottom arrow starts from the right side of the 'ClientPool::terminate' box and points to the bottom half of the 'ClientPool::opCount' box.
