

CompressionFilter::
constructor

CompressionFilter::
receiveMetadata

getCompressionHandler

```
graph LR; A[CompressionFilter:: constructor] --> C[getCompressionHandler]; B[CompressionFilter:: receiveMetadata] --> C;
```

The diagram illustrates two calls to the `getCompressionHandler` method. On the left, two white rectangular boxes represent the callers: `CompressionFilter:: constructor` (top) and `CompressionFilter:: receiveMetadata` (bottom). On the right, a gray rectangular box represents the target method, `getCompressionHandler`. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating the direction of the calls.
