

Operation::constructor

Operation::getOperation

Operation::_unpackResponse

```
graph LR; A[Operation::constructor] --> C[Operation::_unpackResponse]; B[Operation::getOperation] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'Operation::constructor' and the bottom box contains 'Operation::getOperation'. On the right, there is a single, wider gray rectangular box containing the text 'Operation::_unpackResponse'. Two blue arrows originate from the right side of the white boxes and point towards the left side of the gray box, indicating that both 'Operation::constructor' and 'Operation::getOperation' depend on or call 'Operation::_unpackResponse'.
