

SugaredTracer::withActiveSpan

SugaredTracer::withSpan

handleFn

```
graph LR; A[SugaredTracer::withActiveSpan] --> D[handleFn]; B[SugaredTracer::withSpan] --> D;
```

The diagram illustrates a common handler pattern. Two functions, 'SugaredTracer::withActiveSpan' and 'SugaredTracer::withSpan', are shown on the left. Both functions have blue arrows pointing to a single gray box on the right labeled 'handleFn', indicating that both functions delegate their execution to this common handler.
