

PrefixedFirebaseError
::constructor

```
graph LR; A["PrefixedFirebaseError  
::constructor"] --> B["FirebaseError::code"]; A --> C["FirebaseError::message"]
```

The diagram illustrates the relationship between the `PrefixedFirebaseError::constructor` and the `FirebaseError` object. The constructor is shown in a grey box on the left, and it has two blue arrows pointing to the `code` and `message` properties of the `FirebaseError` object, which are shown in white boxes on the right.

FirebaseError::code

FirebaseError::message
