

ReadOnlyRestClient::get

ReadOnlyRestClient
::listen

queryParamsToRestQueryString
Parameters

```
graph LR; A[ReadOnlyRestClient::get] --> C[queryParamsToRestQueryStringParameters]; B[ReadOnlyRestClient::listen] --> C;
```

The diagram illustrates a dependency or reuse pattern. Two methods, `ReadOnlyRestClient::get` and `ReadOnlyRestClient::listen`, are shown in white boxes on the left. Both have blue arrows pointing to a single gray box on the right labeled `queryParamsToRestQueryStringParameters`. This indicates that both methods utilize this common utility function to convert query parameters into a REST query string.
