

GaxiosError::constructor

```
graph LR; A[GaxiosError::constructor] --> B[translateData]
```

A diagram showing a call from the `GaxiosError::constructor` to the `translateData` function. The `GaxiosError::constructor` is represented by a gray rectangular box on the left, and `translateData` is represented by a white rectangular box on the right. A blue arrow points from the right side of the gray box to the left side of the white box, indicating the direction of the call.
