

JwksClient::constructor

```
graph LR; A[JwksClient::constructor] --> B[JwksClient::getSigningKey]; B --> C[JwksClient::getSigningKeys];
```

The diagram illustrates a sequence of three method calls on a JwksClient object. It consists of three rectangular boxes arranged horizontally, connected by blue arrows pointing from left to right. The first box, labeled 'JwksClient::constructor', is white with a black border. The second box, labeled 'JwksClient::getSigningKey', is also white with a black border. The third box, labeled 'JwksClient::getSigningKeys', is shaded gray with a black border. The flow starts with the constructor, followed by getSigningKey, and finally getSigningKeys.

JwksClient::getSigningKey

JwksClient::getSigningKeys
