

SAMLConfig::constructor

```
graph LR; A[SAMLConfig::constructor] --> B[SAMLConfig::getProviderIdFromResourceName]
```

A diagram showing a call from the `SAMLConfig::constructor` to the `SAMLConfig::getProviderIdFromResourceName` method. The source is in a white box on the left, and the target is in a gray box on the right, connected by a blue arrow.

SAMLConfig::getProviderId
FromResourceName
